---

## SUMMARY

---

### Front-End Developer

Motivated and intellectually-curious front end developer proficient in React.js, with two years of professional experience in consulting focusing on cloud computing. Demonstrates adaptability and maintains a growth mindset when faced with complex technical challenges.

## WORK EXPERIENCE

---

### Publicis Sapient

07/2021 – Present

*Associate Software Developer*

*Los Angeles, CA*

- Collaborated with cross-functional teams to deliver cloud transformation solutions for clients, including Capital Group and Ford.
- Developed user-friendly and dynamic interfaces using React.js, resulting in improved user experience.
- Completed training sequences covering tools like React, JavaScript, TypeScript, Python, and Azure.
- Promoted from Junior Associate Software Developer in 01/2023.

### Carnegie Mellon Computing Services

05/2019 – 05/2021

*Student IT Help Desk Assistant*

*Pittsburgh, PA*

- Collaborated with colleagues and customers in-person and via email to troubleshoot issues related to internet connectivity, software downloads, and two-factor authentication.
- Corresponded with customers on behalf of coworkers to help speed up our rate of ticket resolution.

### Procter & Gamble

05/2020 – 08/2020

*Process Engineering Intern*

*Auburn, ME*

- Improved production efficiency in a factory setting by researching and installing hardware, as well as adjusting machine programming to reduce the number of rejects.
- Performed root cause analysis (RCA) by using machine data in Excel pivot tables to identify pain points throughout the production process and predict how they may be remedied.
- Standardized the organizational system used on the floor for production tools, taking guidance from the 5S organizational system.

## EDUCATION

---

### Carnegie Mellon University

08/2018 – 05/2021

*B.S., Mechanical Engineering*

*Pittsburgh, PA*

- 3.7/4.0 GPA.
- Social chair (2019) and Vice President (2020) of CMU's chapter of ASME (American Society of Mechanical Engineers).
